

WEST OF STEAMBOAT SPRINGS

US HIGHWAY 40 - NEPA STUDY

NO ACTION ALTERNATIVE

The No Action Alternative is used as a baseline comparison for environmental analysis purposes. It includes those future projects that have committed funding for improvements. These improvements would be made whether or not any other improvements are made in conjunction with the Preferred Alternative. The No Action Alternative is fully assessed and committed projects that are included in the No Action were collected from:

- The Colorado State Transportation Improvement Program
- The Northwest (NW) Transportation Planning Region's 2035 Regional Transportation Plan
- The West Steamboat Springs Area Plan

One project is currently committed in the study area and will be included as part of the No Action Alternative:

- New Victory Parkway
